SUMMARY

Web Developer specializing in building scalable and user-friendly web applications using PHP, Laravel, and React.js. Experienced in managing e-commerce systems and integrating complex databases. Passionate about clean code, responsive UI, and continuous learning to deliver impactful digital solutions.

PROFESSIONAL EXPERIENCE

PT Telkom Akses - Jakarta

Labeling (Internship Full Time)

(2016 - 2017)

- As an intern at Telkom Akses, I was responsible for labeling Optical Distribution Point (ODP) data to support the company's telecommunication data management. This experience also enhanced my skills in data analysis and attention to detail.
- Designed and developed the company's Company Profile application using Visual Basic, presenting corporate information in an interactive and structured format.
- Implemented an intuitive and responsive user interface (UI) to ensure smooth navigation within the application.
- Collaborated with internal teams to gather content, organize information structure, and conduct application testing.

PT Badan Pengawas Obat dan Makanan (BPOM) - Jakarta

Full Stack Developer (Internship Full Time)

(2019 - 2020)

- Implemented database management using MySQL, performed bug fixes, and maintained the website.
- Deployed the application in a droplet hosting environment, ensuring scalability, security, And high availability.
- Developed a web-based attendance system to automatically record employee attendance.
- Integrated a QR Code Scanner feature to speed up the attendance process and minimize physical contact.
- Utilized technologies such as HTML, CSS, Laravel, and MySQL to build both the backend and frontend of the application.

PT Nexter AI - Korea

Ai Annotator (Freelancer)

(April 2024 - Present)

- Labeled data for artificial intelligence projects, ensuring high accuracy in text and image annotations.
- Coordinated with developers to improve dataset quality and align with project requirements.
- Followed specific guidelines to ensure annotations contributed to enhancing AI model performance across various scenarios

PROJECT

Chandravika Printing Website

- Developed a full-featured printing e-commerce system using Laravel RESTful APIs for product management, authentication, and online payments.
- Optimized MySQL queries for faster transaction processing and improved data scalability.

Nusa Commerce Multi-Channel Management

- Developed an Inventory and E-commerce Management System, enabling seamless online transactions and efficient inventory tracking.
- Integrated the system with Shopee, Lazada, and other e-commerce platforms to ensure smooth data synchronization and order management.

EDUCATION

Universitas Muhammadiyah Jakarta

(2018–2024)

Bachelor of Engineering in Informatics Engineering GPA 2.77

SKILLS

Technical Skills:

- Languages: Java, PHP, Python, TypeScript, JavaScript
- Frameworks: Laravel, React.js, CodeIgniter, .NET, Node.js
- Databases: MySQL, PostgreSQL

Soft Skills

Problem Solving, Analytical Thinking, Time Management, Communication Skills, Adaptability & Continuous Learning, Teamwork & Collaboration
