

MUHAMMAD ARIF HELMI

Full-Stack Developer with Backend Specialization

Jakarta, Indonesia | helmio10394@gmail.com | github.com/arifhelmi | linkedin.com/in/muhammadarifhelmi

SUMMARY

Backend-focused developer who designs and builds scalable APIs, clean application architecture, and practical web products. Experience across social, commerce, and community applications, working from early planning through production delivery.

EXPERIENCE

Tannoi Mobile App - Backend Developer

Built the backend foundation for a voice-first social platform on iOS and Android.

Delivered services for discussion and response flows from concept through deployment.

Nusa Commerce - Backend Developer

Developed backend capabilities for an e-commerce operations platform.

Helped sellers manage and synchronize multiple sales channels from one dashboard.

Fourz Mobile Apps - Backend Developer

Created backend services and content models for a four-image ranking app.

Wrga Mobile Apps - Lead Backend Developer

Led backend development for a neighborhood community app with posting, comments, likes, and local discovery.

SKILLS

Backend: Node.js, Express.js, REST APIs, Authentication, API Integration

Frontend: React, Next.js, Responsive UI, CSS, Web Performance

Database: PostgreSQL, SQL Server, Data Modeling, Query Design

Languages: TypeScript, JavaScript, SQL, HTML, CSS

Delivery & Tools: Git, Docker, API Testing, Debugging, Team Collaboration

PROJECT HIGHLIGHTS

Tannoi Mobile App - Social audio platform

Nusa Commerce - Multi-channel commerce

Fourz Mobile Apps - Content ranking app

Wrga Mobile Apps - Neighborhood community

Muhammad Arif Helmi Portfolio - Personal website

PRINCIPLES

Start with the product goal, then shape the service around it.

Keep APIs predictable, maintainable, and easy for teams to trust.

Build for real use, then improve with evidence and feedback.
